Persian Native

English Reads technical docs

EDUCATION

High School Diploma, Computer Science

Tehran

Frontend developer with 3+ years of experience building production web products, admin dashboards, multi-role systems, and AI-powered interfaces. Experienced in coordinating a frontend team, splitting tasks, reviewing code, and helping resolve technical blockers; focused on clean architecture, UX, performance, SEO, and stable product delivery.

01 Work Experience

Frontend Developer — Ofogh Pazhouheshgaran Badi'

Jun 2025 - Mar 2026 | Tehran

- Coordinated a **4-person** frontend team on the **Fixino** and **Anashid** products; split tasks, aligned feature delivery, reviewed code, and unblocked teammates on technical issues.
- Designed and built Fixino's multi-role flows for drivers, mechanics, tow operators, and admins, including incident reporting, nearby-service requests, quote management, and role-specific dashboards.
- Built Anashid's interfaces, including an AI chat with streaming responses, conversation history, an admin dashboard, and a model library.
- Worked closely with backend and product teams on API integration, cross-layer bug fixes, SEO and performance optimization, and release readiness.

Freelance Frontend Developer

Sep 2024 - Jun 2025

- Designed and built UI for FiveM servers, including HUD, inventory, and real-time interactive elements.
- Built responsive, optimized interfaces and worked with the team to connect UI to server-side logic in a real-time environment.

Frontend Developer — Aseman Soo-ye Parsian

Nov 2023 - Sep 2024 | Tehran

- Joined through a specialized internship and moved onto the development team after completion.
- Contributed to operational dashboards for a logistics company involving complex business logic and sensitive data.
- Redesigned the route/sub-route structure and implemented precise calculations to reduce system errors and improve flow stability.
- Built UI following clean-code principles with a modular, maintainable structure.

02 Selected Projects

LoveVault — Couples App

[Website](#) · [Screenshots](#)

Next.js · TypeScript · Tailwind CSS · Node.js · Express · MongoDB · CI/CD

Built the full product independently — frontend, backend, authentication, admin panel, deployment, and infrastructure. Designed a couple-based architecture, vault management, a gamification system, and monitoring/user-management tools.

Fixino — Accident Reporting Platform

[Website](#) · [Screenshots](#)

Next.js · TypeScript · Tailwind CSS · SEO · CI/CD

Built the multi-role interface and core product flows, focused on UX, SEO, performance, and deployment.

Anashid — AI Platform

[Screenshots](#)

Next.js · TypeScript · Tailwind CSS · Streaming UI · API Integration

Built real-time chat, conversation history, an admin dashboard, and interfaces for AI model interaction.

03 Professional Strengths

- End-to-end feature ownership, from requirements to release
- Code review and unblocking team members
- Hands-on experience with SEO and performance
- Effective collaboration with backend and product teams
- Improving project structure and architecture
- Preparing and running deployment processes
